Office Action Summary

Art Unit: 1774

1. Claims 1-5 and 18-26 are rejected under 35 USC (first paragraph) as being broader than the enabling disclosure as a result of applicant's failure to recite that the additive is polystyrene.

While generic reference is made to organic small molecule material, inert polymers, conductive polymers and conjugated polymers, no guidance other than the use of polystyrene is given with respect to the selection of suitable additives. Consequently, suitable additives other than polystyrene can not be determined without undue experimentation.

2. Claims 16 and 17 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

3. Applicants' attention is directed to the misspelling "polystere" in claim 17.
